EXAMINER'S COMMENT

1. The drawing filed on October 9, 2007 is accepted by the Examiner.

REASONS FOR ALLOWANCE

2. Claims 1-9 are allowed.

3. The following is an examiner's statement of reasons for allowance:

None of the references cited disclose and/or teach a method of checking for excessive drag in an elevator system having a car moveable in a hoistway, comprising: initially, establishing baseline currents while the elevator car is operating properly with no drag; comparing the motor current used to operate the car with the motor current predicted to be required to move the car under its present load, direction and position in the hoistway; if the actual motor current exceeds the predicted motor current by a tolerance value, shutting down the elevator at the next committable floor; method of checking for effective brake operation in an elevator system having a car moveable in a hoistway, comprising: first determining a baseline amount of motor current required to move the elevator car, thereafter periodically determining whether a high fraction of said baseline amount of current is capable of moving the elevator car by more than a small tolerance amount and if the car does move by more than said tolerance amount, a torque fault message for service personnel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
